

NASA NBL/SVMF Awards and Recognition

Throughout the years, NASA's NBL/SVMF has received many awards and recognition for excellence in safety. NASA's NBL/SVMF has one of the highest safety records throughout Raytheon and NASA. When our customer's lives depend on the quality of Mission Support, our employees take all practical steps to avoid loss of life, personnel injury or illness, property loss or damage, or environmental loss or damage. Please read below to learn more about some of the highlighted awards they have received:

OSHA Star of Stars – Voluntary Protection

2006 and 2007

OSHA Star of Stars, Star of Excellence Award - Voluntary Protection Plan (VPP) program is designed to promote superior safety and to recognize outstanding employer and employee safety performance. NASA's Johnson Space Center achieved the prestigious recognition as an OSHA/VPP STAR site. The VPP program covers four major elements of a safety and health program:

- Management commitment and employee involvement
- Hazard prevention and control
- Worksite analysis
- Safety and health training

JSC Safety Excellence

2007

Raytheon Technical Services Company in Houston, Texas received the 2007 Johnson Space Center Contractor Safety Forums (CSF) Super Nova Award for Safety Excellence. It is awarded by NASA's Safety Director based on numerous safety criteria - all of which RTSC- Houston surpassed. This is the highest award presented for safety excellence at Johnson Space Center.
