

Raytheon AESA

Active Electronically Scanned Array Radar

See all. Target all.

Raytheon's proven multi-mode, multi-platform AESA technology can simultaneously guide multiple missiles to multiple targets widely spaced in azimuth, elevation and range, with unprecedented precision. Leveraging our vast Mission Systems Integration capabilities, AESA technology enables various platforms to gather, process and share information, air-to-air and air-to-ground, with a speed and reliability far greater than any other radar. In short, it provides today's aircraft with a revolutionary level of situational awareness, and the vast operational advantages that go with it.
