

ATFLIR

Advanced Targeting Pod

From miles away,
they're still point blank.

Raytheon's Advanced Targeting FLIR assures mission success by integrating the world's most advanced EO and IR sensors with the most powerful laser on the market. ATFLIR can locate and designate targets day or night at ranges exceeding 40 nautical miles and altitudes surpassing 50,000 feet, outperforming all other pods. As a powerful net-enabler, it can pass tracking and targeting information to other nodes in the networked battlespace, with the speed and precision so critical to victory.
