

Supporting Math and Science Education

Math and science change the way students look at things — especially themselves.

Mastering math and science doesn't just help students build skills – it helps build confidence. That's why Raytheon created MathMovesU™, a national initiative designed to show middle school students that they can master math, and that it will take them to lots of cool places. Raytheon is also proud to support MATHCOUNTS®, which motivates more than 500,000 middle school students to sharpen their math skills each year. By working to improve our children's proficiency in math and science today, we're giving them what they need to improve our world tomorrow.
