

Biography

Len Grasso is the Raytheon Technical Services Company LLC Program Manager of Raytheon's OPTARSS II Team. A coalition of industry leaders, the Raytheon OPTARSS II Team was established to bid for U.S. Army Forces Command's (FORSCOM) Operations, Planning, Training and Resource Support Services (OPTARSS) II contract. He was appointed to this position in October 2007. Raytheon's OPTARSS II Team includes members of several small businesses with proven premiere credentials in Army support services.

Grasso is responsible for managing the diverse, mission oriented Raytheon-led team that combines breadth of expertise and responsiveness to deliver quality warfighter readiness support. The Raytheon OPTARSS II Team comprises the right mix of capabilities in the areas of force protection, training, deployment operations, modeling and simulation, mobilization plans and execution, transformation, flight operations, and operational planning. As a total systems provider, the Raytheon OPTARSS II Team provides the capability to support and prepare rapidly deployable and agile forces of the U.S. Army.

Grasso retired from the U.S. Army after 26 years of service following assignments as chief of operations, II Corps, and deputy chief of Current Operations, U.S Central Command. He has worked in industry for eight years in several positions to include training analyst, deputy program manager, deputy site manager, operations manager for the Abrams Tank System, and most recently as the Future Combat System Lead Systems Integrator (LSI) Logistics Requirements and Readiness lead at Fort Bliss, Texas. In this capacity, he supervised and directed fielding and logistic operations for the initial effort of the Future Combat System.

Grasso received a master's degree in national security and strategic studies from the U.S. Naval War College in Rhode Island, and a master's degree in business management from Webster College in Missouri.
