

SureView™ Cybersecurity and Information Assurance Technology

Why Raytheon SureView?

Raytheon SureView has been securing the nation's most critical and sensitive networks from internal leaks, compromise and malicious attacks for more than a decade. SureView is a mature and agile cyber audit solution that enables a proactive strategy to protect critical data by monitoring technically observable human behaviors.

SureView is the insider threat solution of the U.S. government and Fortune 100 companies.

SureView offers:

- Proven, scalable, widely deployed and the lowest-risk solution for the federal government and Fortune 500 enterprises.
- Fully customizable audit policies. You decide what is audited and what each audit record contains using simple policy wizards.
- An audit of all vectors of communication, including email, IM, browsers and removable media.
- World-class scalability, from laptops to the enterprise.
- Sensitivity for privacy with policy-driven auditing: It can ignore out-of-scope or privileged communications.
- DVR-like playback of audited events with a view of user intent and event context to help discriminate between user training issues and deliberate behavior.
- An Investigator Workbench to enable simplified event analysis and case management.
- Strong management control features, such as role-based analyst security and two-person authorization to provide secure command and control over sensitive auditing with the ability to monitor encrypted, decryption and offline behavior.
