

Emanuel Brady Jr. is vice president for Information Technology in the Space and Airborne Systems business of Raytheon Company. As vice president, Mr. Brady is a member of the SAS Leadership Team.

In response to changing business and technical demands, Information Technology provides agile solutions that reinforce Raytheon's one-company information systems and services philosophy.

Mr. Brady began his career in 1982 as a systems programmer for the former Hughes Aircraft Company. He progressed through a series of leadership positions in data center management, architecture and systems engineering, and operating system management. In addition he served as a senior consultant in architecture and systems engineering.

Before assuming his current position in 2004, Mr. Brady was vice president, Information Technology, for Raytheon's Electronic Systems unit.

Prior to joining Raytheon Mr. Brady directed the operations and technical support organization of Sony Pictures Entertainment.

A profile of Mr. Brady appeared in a featured article in the October/November 2007 issue of *Urban Influence* magazine, in which he discussed his role in diversity and mentoring programs at Raytheon. More recently, he was a contributing author of *The Handbook of High Performance Virtual Teams*.

Biography

Mr. Brady received a BS in mathematics from California State University at Los Angeles and a MBA from the University of Southern California. He is the recipient of the 2002 Black Engineer of the Year Award. In 2007 he was named Executive of the Year by the Raytheon Management Club.

Raytheon Space and Airborne Systems (SAS) is a leading provider of sensor systems giving military forces the most accurate and timely actionable information available for the network-centric battlefield.
