

Edward Miyashiro is a Raytheon Company vice president and deputy general manager of Raytheon Missile Systems. He assumed the position in August 2006 and was elected an officer of the company in May 2007. Raytheon Company (NYSE: RTN), with 2009 sales of \$25 billion, is a technology and innovation leader specializing in defense, homeland security and other government markets throughout the world. With headquarters in Waltham, Mass., Raytheon employs 75,000 people worldwide.

Headquartered in Tucson, Ariz., Missile Systems has locations in California, New Mexico, Kentucky and Arkansas. Its broad portfolio of weapon systems supports every mission area of its customers, including air-to-air, land combat, naval weapons, strike weapons, missile defense, guided projectiles, and directed energy systems. The business continually develops and invests in new, innovative technologies to provide rapid, high-quality, affordable mission capability to its customers. With a workforce of 12,500 employees and 2008 sales of \$5.4 billion, Raytheon Missile Systems is the world's leading producer of weapon systems for the United States military and the allied forces of more than 50 countries.

A 34-year veteran of the defense industry, Miyashiro previously served as vice president of the business's Naval Weapon Systems product line with responsibility for providing the U.S. and its allies with broad mission capabilities in anti-surface warfare, layered air defense,

Biography

naval surface fire support and ballistic missile defense. In this role since 1998, Miyashiro led and participated in numerous international cooperative developments and production programs involving more than 20 allied countries.

Earlier, Miyashiro served as program director for all Standard Missile programs, where he was responsible for all versions in production and numerous engineering development programs, support services, test equipment, design agents and a broad range of engineering efforts performed under technical instruction.

Miyashiro has also served as program director for the Terrier Lightweight Exoatmospheric Projectile program, which paved the way for sea-based ballistic missile defense. He was also a program manager on the Advanced Air-to-Air Missile and, prior to that, served in various engineering management roles.

Miyashiro began his career with General Dynamics, Pomona Division, in 1974 as an associate engineer. Originally from the Los Angeles area, Miyashiro has a bachelor's degree in mechanical engineering from the University of California, Berkeley. He has also attended numerous university and corporate-sponsored certificate programs including those in systems engineering, engineering management and program management.
