

Biography

Christian Herring is the Head of Information Technology (IT) within Raytheon Australia. In this role, Christian is responsible for leading the IT function with a focus on program capture and execution.

He is also responsible for establishing and maintaining effective relationships with IT and technology principals of business partners and leads Raytheon Australia's efforts in the identification and application of cyber technologies to support the company's strategic plans.

Prior to his appointment in January 2016, Christian was the Strategy Executive responsible for working with the Managing Director and General Manager Strategy to develop the Raytheon Australia five-year strategic plan. To support this role, Christian developed an intricate level of company, competitor and market knowledge, for the purpose of devising future growth strategies.

Christian also held key positions in Information Technology on the Air Warfare Destroyer Alliance. As Head of Information Technology, he was responsible for providing leadership and strategic direction for IT across the program. Prior to this, he was the IT Infrastructure and Security Manager.

Prior to joining Raytheon Australia in 2008, Christian was the IT Manager for the Adelaide Festival Centre.

Since 2001 he has occupied a number of IT-related roles both within and external to the company, including positions within Network and UNIX Systems Administration.

Working within the hospitality and IT-management sectors has afforded Christian the opportunity to develop a strong appreciation for providing customer focused, technically sound solutions.

Amongst his professional credentials is an Education Degree, a Diploma in Information Technology and numerous industry certifications.

Christian is a Raytheon Six Sigma specialist, Graduate of the Raytheon Australia Business Leadership Program and a Graduate of the Raytheon Company Leadership Excellence Program.
