

## Biography

Warren Latham is the General Manager Submarines for Raytheon Australia.

The Submarines Product Line is focused on delivering mission systems integration and mission support for the Australian Submarine Force.

Based in Sydney, Warren is responsible for all submarine operations including program execution throughout Australia.

Warren began his employment at Raytheon Australia in 1999 as the Hardware Engineering Functional Manager before transitioning into numerous program management and business operations roles.

Roles included the Program Director for the Collins Replacement Combat System, Combat System Director for the Australian Warfare Destroyer Program, Naval Integrated Systems Operations Director and more recently the Deputy General Manager for Integrated Solutions.

Before his employment at Raytheon Australia, Warren served 20 years in the Royal Australian Navy, initially specialising as a weapons systems tradesman, before transitioning to become a weapons electrical officer.

During his naval career, Warren served on a number of naval warships.

Warren is a graduate of Royal Melbourne Institute of Technology, with a Bachelor of Engineering (Electrical) with honours.

Warren is a registered Program Director with the Australian Institute of Program Management.
