Raytheon Virtual Training
Comprehensive virtual training solutions

Raytheon

Raytheon's Virtual Training suite offers a range of full-service Virtual Classroom Training solutions tailored to your company's unique needs. You can virtualize the entire classroom experience, or only aspects of it. Your culture and unique learning objectives determine the most appropriate option for you.
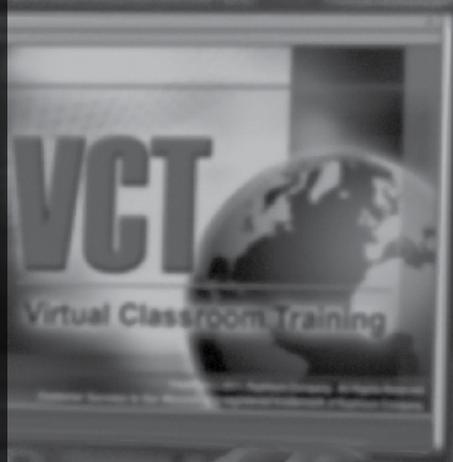

The Raytheon Virtual Training suite of solutions includes:

- VILT360 (Virtual Instructor-Led Training)

- VCT360 (Virtual Classroom Training)
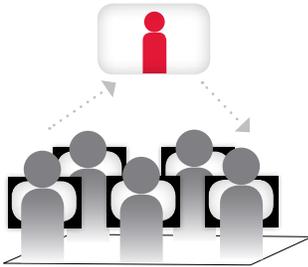

- VBroadcast360 (Virtual Auditorium)

All the solutions in Raytheon Professional Services' (RPS) Raytheon Virtual Training suite provide a highly interactive learning experience at a fraction of the cost of traditional instructor-led training.

BENEFITS

- Significantly lowers training delivery costs compared to traditional instructor-led courses

- Increases training reach and accessibility through recorded sessions making training available anytime, anywhere

- Facilitates multiple learning styles for an optimized training experience

- Drives consistency across the organization by communicating the same content to multiple learners in disparate locations

- Integrates with a Learning Management System for seamless tracking and reporting

- Allows key instructors and subject-matter-experts to be more widely available

Flexible Raytheon Virtual Training solutions backed by 70 years of expertise

VILT360
(Virtual Instructor-Led Training)

For organizations that rely heavily on traditional classroom instruction, VILT360 offers a comfortable first step into Raytheon Virtual Training because it virtualizes only part of the classroom experience.
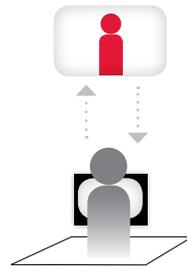

In the VILT360 solution, learners continue to come together in traditional classroom venues — preserving the benefits of peer-to-peer collaboration and networking.

The instructor, however, is virtual and joins the live classrooms via a Raytheon Virtual Training platform. This enables one instructor to facilitate multiple classrooms of students simultaneously.

For training organizations, the Raytheon VILT360 solution enables them to:

- Compress the course delivery schedule of large-scale, geographically dispersed audiences
- Eliminate instructor travel expenses
- Prevent instructor travel "burn out"
- Preserve live collaboration and networking among learners

The VILT360 solution delivers many of the cost savings and efficiencies of Raytheon Virtual Training while retaining the live collaboration experience associated with traditional instructor-led training.

VCT360
(Virtual Classroom Training)

The Raytheon VCT360 solution virtualizes the entire classroom experience, allowing instructors and students to meet in a collaborative virtual classroom built specifically for training delivery.
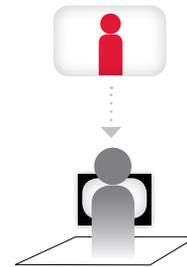

Instructors and students use Voice-over-IP (VoIP) or a telephone line for two-way communications. Students also see instructors and subject-matter-experts through a video stream. Instructors and students can share a common whiteboard, applications and other class resources, including web pages. Instructors can also initiate interactive polls, knowledge checks, breakout sessions, animations and assessments to increase student engagement.

Courses are recorded for on-demand playback after the session for just-in-time performance support or for employees who could not attend.

The VCT360 solution provides a more interactive and engaging experience than found in a traditional instructor-led course. RPS helps you optimize every aspect of your course — from content to instructor and from technology to support.

The VCT360 solution enables you to:

- Eliminate travel expenses
- Eliminate facilities costs
- Compress "time in class," making your employees more productive
- Make training more widely available and accessible

VBroadcast360
(Virtual Broadcast)

When an organization simply needs to inform — not train — a group of people, the VBroadcast360 solution is a perfect way to rapidly convey information to a geographically dispersed audience.

With the VBroadcast360 solution, the presenter and the audience convene in a virtual auditorium where the presenter can easily communicate their message to a large number of people simultaneously.

In this virtual auditorium, the audience sees a video stream of the presenter and the materials being presented. These sessions feel like a TV broadcast — participants see and hear the message, but do not ask questions or provide feedback.

The VBroadcast360 session can even be streamed in HD format for a high quality video broadcast, and every VBroadcast360 session can be recorded for on-demand playback.

Capabilities that extend the reach and impact of classroom learning

Content Services

Dynamic Raytheon Virtual Training sessions begin with engaging content. The Raytheon Virtual Training experience offers comprehensive content services that optimize content for virtual delivery. RPS incorporates collaborative, media-rich elements that bring your course to life. These include:
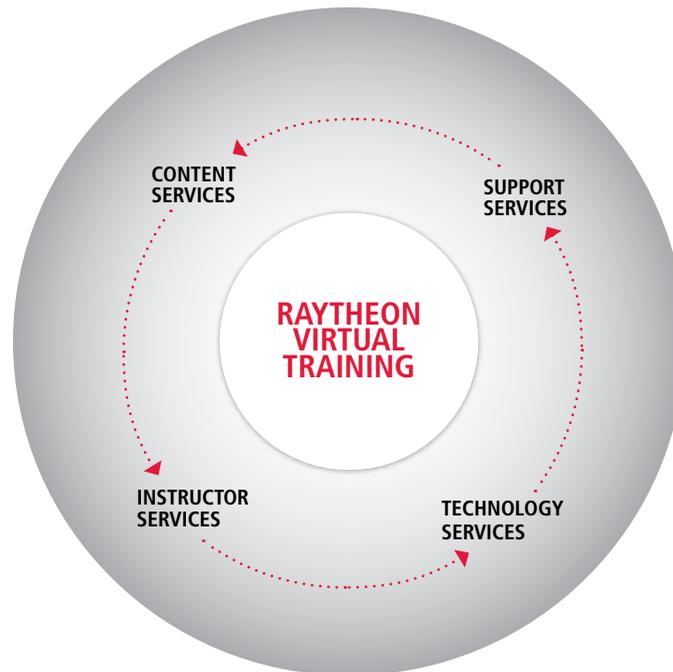

- Interactive polls
- Knowledge checks
- Breakout sessions
- Animations & 3-D graphics
- Assessments

This ensures an experience that engages multiple senses and accommodates multiple learning styles. So your organization can increase knowledge retention and achieve outcomes that align perfectly with program objectives.

Instructor Services

Training instructors to adapt their teaching styles for virtual delivery is key to delivering an engaging, impactful virtual session. That is why all of the solutions in our Raytheon Virtual Training suite offer a broad spectrum of instructor services, including:

- Virtual platform orientation training
- Virtual instructor certification workshop
- Session rehearsal
- "Co-pilot" assistance during the session
- RPS provided instructors

CONTENT SERVICES

SUPPORT SERVICES

RAYTHEON VIRTUAL TRAINING

INSTRUCTOR SERVICES

TECHNOLOGY SERVICES

Technology Services

All solutions in our Raytheon Virtual Training suite are platform agnostic. RPS can host your virtual session on our Raytheon Virtual Training platform, or deliver the VCT experience through your existing virtual classroom package.

To ensure broadcast quality, RPS offers access to a full-service broadcast studio in Troy, Michigan, as well as a portable Studio-in-a-Box.

Whether an organization chooses to host the sessions or opts to have RPS host them, they'll draw from an extensive arsenal of services that optimize the impact of the learning experience, such as:

- Session recordings
- Learning Management System (LMS) reporting

Support Services

To ensure that instructors are free to concentrate on content quality and delivery, RPS supports every Raytheon Virtual Training session from beginning to end. Managing learner registration, distributing the necessary materials, addressing any technical issues that arise — it's all part of providing a comprehensive Raytheon Virtual Training experience that helps you successfully and cost-effectively train your employees across the globe.
