Forward-deployed soldiers rarely have easy access to reliable voice and data connections. Raytheon’s suite of troposcatter beyond-line-of-sight communication solutions create secure, reliable wireless data networks with data transmission speeds of up to 100 mbps nearly anywhere in the world, regardless of terrain or operational conditions.

**APPLICATIONS**
- Command centers
- Mobile command posts
- Restoring emergency communications
- Primary communications infrastructure and other mobile and fixed uses
- Offshore communication links

**SUPERIOR PERFORMANCE:**
- Achieved data rates of 50 mbps at a range of over 115 miles
- Setup times under 30 minutes
