

RAYTHEON UK OVERVIEW

ENGINEERING A SAFER WORLD

OUR VISION

To deliver quality growth to Raytheon through the delivery of affordable UK-based capability in our business areas for UK customers and export markets where selling from the UK provides a competitive advantage.

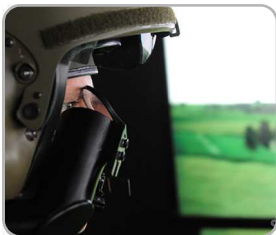

OUR BUSINESS

AIRBORNE INTELLIGENCE, SURVEILLANCE AND RECONNAISSANCE (ISR). Special Mission Aircraft, Situational Awareness and Target Planning. In highly complex operational scenarios, where enhanced surveillance and reconnaissance data and accurate actionable intelligence is key, our ISR solutions deliver results. Airborne ISR possess world-leading expertise in the development, modification and support of special missions aircraft, delivering full-spectrum capability in design, development, manufacture, integration and support of a range of intelligence collection platforms.

CYBER & INTELLIGENCE. Hackers. Worms. Trojan horses. We offer unmatched end-to-end capabilities that protect customers' mission-critical information and infrastructure from the most complex threats and vulnerabilities. Our intelligence and security capability encompasses the following three business areas: defence intelligence services, information exploitation and cybersecurity.

GLOBAL SENSORS. Our solutions provide a range of enabling technologies to enhance mission effectiveness in C4ISR, Air Traffic Management, Manoeuvre Support, GPS Anti-Jam, Training, Optical Solutions and Integrated Power Solutions. Across air, land, sea and space Raytheon UK's mission-critical solutions enhance soldiers' and commanders' situational awareness, command and control, offering advanced protection and precise performance.

WEAPONS. In a new era of warfare, our precision weapons are right on target. Raytheon is one of the world's leading complex weapons systems suppliers, and Raytheon in the UK continues to be a valued player in the UK market, providing the Royal Air Force with its 'free fall weapon of choice.'

KEY CAPABILITIES

- PRECISION WEAPONS
- CYBER
- SENSORS AND IMAGING
- AIR TRAFFIC CONTROL MANAGEMENT
- ANTI-JAM GPS NAVIGATION
- TRAINING
- AIRBORNE SOLUTIONS
