

Biography

Jim is the General Manager Joint Battlespace Systems for Raytheon Australia.

Based in Brisbane, Jim is responsible for the Joint Battlespace Systems product line which includes acquisition and in service support projects in the Joint, Aerospace and Land domains. The projects include simulation and training, electronic warfare test and training services, future range programs, and Short Range Ground Based Air Defence.

Jim joined Raytheon Australia in 1999 and has held leadership appointments in general management, program management, integrated logistics, and supply chain management. Furthermore, he was the Deputy Director of the Support System IPT for Australia's largest approved major project with the Defence Materiel Organisation, the Air Warfare Destroyer program. He also spent a number of years successfully managing a portfolio of performance-based sustainment programs.

Prior to his employment with Raytheon, Jim had a rewarding career with the Australian Defence Force in the fields of logistics, operations, and project management. His service included time in Special Operations, Support, and Training Commands.

Jim is a graduate of the University of New South Wales, where he attained a Master's Degree in Management (Project Management & Military Technology), and has further qualifications in integrated logistics, project management and training. In addition, he is a certified practicing project director with the Australian Institute of Project Management and maintains membership with several professional associations.
