

Biography

Warren Latham is the General Manager Submarines for Raytheon Australia.

The Submarines Product Line is focused on delivering Combat System Integration and Mission Support for the Collins Class Submarine.

Based in Sydney, Warren is responsible for all Raytheon Australia submarine operations including program execution throughout Australia. This includes providing deployed support where and when required.

Warren began his employment at Raytheon Australia in 1999 as the Hardware Engineering Functional Manager before transitioning into numerous program management and business operations roles.

Roles included the Program Director for the Collins Replacement Combat System, Combat System Director for the Australian Warfare Destroyer Program, Naval Integrated Systems Operations Director and more recently the Deputy General Manager for Integrated Solutions.

Before his employment at Raytheon Australia, Warren served 20 years in the Royal Australian Navy, initially specialising as a weapons systems tradesman, before transitioning to become a weapons electrical officer.

During his naval career, Warren served on a number of naval warships.

Warren is a graduate of Royal Melbourne Institute of Technology, with a Bachelor of Engineering (Electrical) with honours.

Warren is a registered Program Director with the Australian Institute of Program Management.
