

Warren Latham

General Manager Under Water Systems

Warren Latham is the General Manager Under Water Systems for Raytheon Australia.

Based in Sydney, Warren is responsible for the Under Water Systems product line, which includes capability upgrades and sustainment programs for the Collins Class Submarine Combat System and the Integrated Under Water Surveillance domain. These programs are executed throughout Australia and include the provision of deployed support, where and when required.

Warren commenced with Raytheon Australia in 1999 as the Hardware Engineering Functional Manager before transitioning into numerous program management and business leadership appointments.

Roles included, Program Director for the Collins Submarine Replacement Combat System, Combat System Director for the Air Warfare Destroyer program, Naval Integrated Systems Operations Director and Deputy General Manager for Integrated Solutions.

Before joining Raytheon Australia, Warren served 20 years in the Royal Australian Navy, initially specialising as a weapons systems tradesman, before transitioning to become a weapons electrical officer. During his career, Warren served on numerous naval warships.

Warren is a graduate of the Royal Melbourne Institute of Technology, with a Bachelor of Engineering (Electrical) with honours.

Warren is a registered Program Director with the Australian Institute of Program Management.
