

Raytheon Professional Services part of team transforming the Royal Navy's technology, training and learning solutions

Team awarded contract to modernise and transform the Royal Navy's training over 12 years

LONDON, (Feb. 4, 2021) – Raytheon Professional Services (RPS) and Raytheon UK, business units of Raytheon Technologies (NYSE: RTX), alongside strategic partner Capita, received a contract award to provide the Royal Navy with transformative technology, training and learning solutions over the next 12 years.

As a part of the Fisher consortium, led by Capita, Raytheon UK and partner Raytheon Professional Services have been awarded a critical part of the programme to modernise the Royal Navy's curriculum. The contract has an initial contract value of £200 million to ensure the Royal Navy offers best-in-class training for all its service personnel. It will accelerate the use of new technology, processes and learning solutions, aligning with the Royal Navy's transformation agenda and positioning it to thrive in the 21st century.

"We are proud of being selected as the training modernisation partner to ensure the Royal Navy will have access to state-of-the-art learning solutions combining best practices and innovation in learning. RPS will bring the very best in learning design, modernisation to provide best-in-class learning that meets the needs of every individual participant in this exciting new programme," said Steve Thompson, director of Business Development, Europe, Middle East and Africa for RPS.

A key part of our solution set with large, complex training systems is the Architect Methodology, which is a bottom-up analysis method enabled by expertise and tools and not a database on its own. Getting the foundation right and removing redundant and unneeded content not only streamlines the courses but lays the foundation for moving to more modern media for delivery.

"Our clients want better training and training outcomes that deliver increased capability to their operations. The goal is to collaboratively focus on capability provision and drive the proper mix of formal and on-board training," said Darrell Peatross, Consulting Services Europe, Middle East and Africa for RPS.

About Raytheon Professional Services

As a part of Raytheon Technologies, Raytheon Professional Services (RPS) is a global provider of managed learning solutions for commercial, government and military customers across 15 industries.
