Raytheon NMT
Navy Multiband Terminal

Making it powerful takes Raytheon’s innovation.
Ensuring it’s ready takes Raytheon’s expertise.

Raytheon’s Navy Multiband Terminal (NMT) delivers both innovation and readiness to ensure Navy warfighter success. Harnessing unmatched domain knowledge, over 30 years of expertise, and the resources of a $20 billion-plus industry leader, Raytheon’s NMT solution culminates over 13,000 hours of ship-board research for the program, ensuring optimal, highly jam-resistant, “no doubt” performance under the most demanding conditions. Raytheon’s NMT is a reliable, affordable, open-architecture solution that is ready now to meet the needs of the U.S. Navy and coalition partners for assured communications, and readily extendible to employ future technologies as they become available.
