NATIONAL ADVANCED SURFACE-TO-AIR MISSILE SYSTEM (NASAMS)

THE MID-RANGE SOLUTION

A highly adaptable solution for any operational air defense requirement

Different types of combat-proven missiles on a common rail

High Mobility Launcher
- Fire and Forget
- Low Manning Requirements
- Proven Missiles
- Netted and Distributed

Characteristics of the Threat
- Unmanned Systems
- High Precision Munitions
- Long Standoff Range
- Weapons of Mass Destruction

NASAMS maximizes the warfighter’s ability to quickly identify, engage and destroy
