

THE EVOLUTION OF PROACTIVE THREAT HUNTING

UNITED KINGDOM

Managed security services (MSS) of yesterday, such as anti-virus, firewalls and sandboxing, meant waiting for bad news and reacting. Today, proactive hunting can stop damaging threats before they cause damage, but many providers are still reactive-focused.

WHAT ARE MSS VENDORS FINDING?

Web-borne malware attacks **57%**

Software vulnerabilities over 3 months old **52%**

Traditional MSS vendors miss newer vulnerabilities that cyber hunters find

Top factor holding back UK cyber strength:

Not enough staff

Top challenge keeping UK organizations from using MSS:

Lack of visibility into vendor systems

UK LAGS IN SEEING VALUE IN MSS
