In this infographic, we explore the top cybersecurity megatrends, focusing on the top three threats by 2018, the most significant security risks to companies, and insights from senior leaders. We also look at the most beneficial enabling technologies for cybersecurity and the human vector.

**Top Cybersecurity Megatrends**

- **Zero-Day Attacks**
- **Cloud Data Leakage**
- **Existing Software Vulnerability**

**Most Significant Security Risks to Companies**

- **Cyber Crime**
- **Enabling Technologies**
- **Human Factors**
- **Disruptive Technologies**

**Most Beneficial Enabling Technologies for Cybersecurity**

- **Anti-Virus**
- **Data Analytics**
- **Attackers Sophistication**
- **Business and IT Operation Complexity**

**Human Vector**

- **Employee Activity Less a Concern in 2018**

**Focus on Technology**

- **2015 Most Significant Security Risks**
  - File Sharing Tools
  - Bring Your Own Device (BYOD)
  - Cloud Apps
  - Hactivism

- **2018 Most Beneficial Enabling Technology**
  - Anti-Virus

**Optimism**

- **Most Security Officers Forecast Improved Security Readiness by 2018**
  - 60% U.S.
  - 55% Europe
  - 64% Middle East
