Centralized and Remote Operations and Maintenance

The cost of operations and maintenance of increasingly complex systems in remote and hostile environments continues to rise. Unify’s solution suite enables centralized remote control and maintenance of large global IT enterprises and other equipment. Multiple sites can be operated from a central control center – reducing operations and maintenance costs.

10 Years
Proven implementation within the Intelligence and Defense environments

28%
Fewer system maintainers across enterprise on one multi-site contract

40%
Cost savings due to decrease in overseas deployment

0%
Mission impact due to low-risk, flexible, bolt-on implementation
