

BAT™ Personnel Tracking Devices

The ability to locate and track personnel and allow them to securely communicate and signal an emergency situation are critical elements in operational missions. Raytheon Blackbird Technologies' satellite-based beaconing and messaging device, the Blackbird Asset Tracker (BAT), offers crucial situational awareness in mission-critical situations.

Features and Benefits

- Secure, Reliable, and Precise Tracking of Personnel in Operational Situations
- Emergency Signaling to Shorten Response Timelines
- Encryption with Device-Unique Keys for High Security
- Two-Way Messaging for Applicable Devices
- Central Monitoring and Control of Deployed Teams
- Decreased Exposure of Personnel to Risk
- Intuitive and Simple to Use in High-Stress Situations
- Compact Form Factor for Easy Carry

Applications

- Tactical Military Deployments
- Personnel Recovery Missions
- Natural Disaster Responses
- Humanitarian or Remote Infrastructure-Building Activities
- Law Enforcement Operations
- Intelligence-Gathering Missions

The small, easy-to-use BAT hand-held device is widely used by military, law enforcement, and first responder elements for personnel tracking, emergency signaling, messaging, and asset/target tracking. The BAT can work in conjunction with Raytheon Blackbird's other leading-edge tagging, tracking, and locating (TTL) solutions and our Gotham™ central C3 and monitoring system.

Personnel Tracking in a Simple, Rugged, Hand-Held Device

The BAT allows users to be tracked in near real-time. The unit operates on commercial batteries and can be carried in a standard uniform or tactical vest pocket. It supports encrypted messaging and incorporates a high-precision GPS receiver, selectable beacon

intervals, four manual brevity message buttons, and an emergency signaling mode. The 5.0" x 2.75" x .875" BAT is Globalstar based and has coverage over most land mass areas with one-way messaging, tracking, and emergency signaling.
